Behringer 24ch Rhino Racks

The Behr 24ch Rhino rack uses four Behringer 6230 rack dimmers. Each rack dimmer providing 6ch of 1.2K (10a) per channel. DMX input and sweepable channel assignment from 1-512. Individual rack dimmers are modified adding a channel output "barrier strip" and L21-20 input power connector on the rear of each chassis. Bracket rails are provided internally to support the rear of the dimmers.

A distro block is provided in the base of the rack acting as power distribution. A variety of input/output and breaker panels are available to suit any end-user configuration. Top hinged lid swings upward to access integral patch bay. Mono point connectors. Female patch receptacles connected to dimmer outputs. Male connectors attached to panel outputs.

Rhino rack has front & back removeable doors and rack rails. Side walls remove for cleaning. Heavy duty spring handles, 14g rectangular steel tubing frame built for heavy duty applications.
