SmashWolf Assemblies

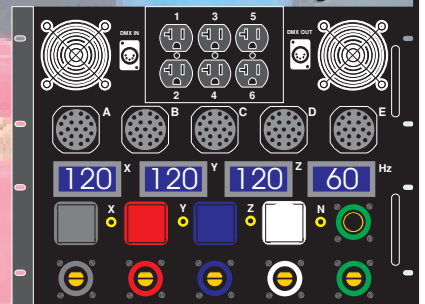

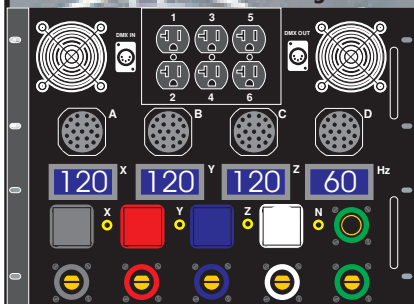

4 Soca

Five Soca

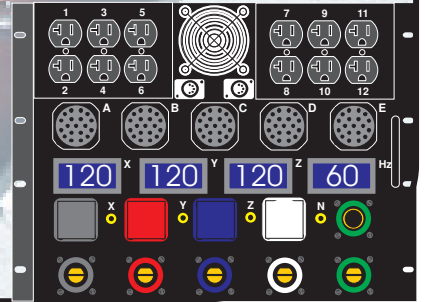

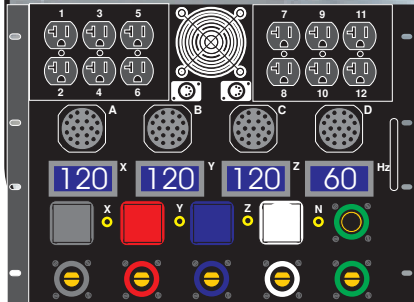

Available Three Phase or Single Phase

Available Three Phase or Single Phase

Standard Cam or Neutral & Ground Reversed

Standard Cam or Neutral & Ground Reversed

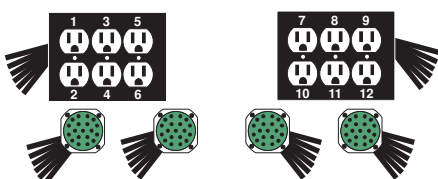

8U SmashWolf assemblies are a unique combination of Camlock, Soca, Edison, XLR and cooling fans, all on the same panel. Panels are shipped prewired and generally require simple termination to begin using immediately.

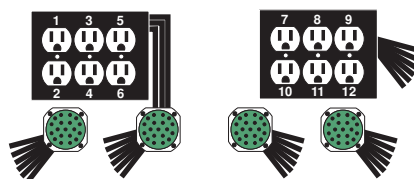

Camlock connectors are a standard 16 series camlock w/ pass thru and snap doors. Single phase arrangement as well as neutral and ground reverse are available by request. Soca Connectors are available in either a 5 unit (30ch) or 4 unit (24ch). Neutrals and grounds are wired directly to Cams. 24" hot leads are provided as either 12g thhn wire unterminated or with Edison U-Ground plugs. Edison outputs can be wired independently or hardwired directly to Soca connectors (see diagrams below). Fans are wired with 24" leads and unterminated. XLR connectors are terminated with 24" leads and 5 pin XLR (DMX) or 3pin XLR (Multiplex).

Volt and Hertz meter bridge is standard. See Camlock panel section of Dimmerrack site for Cam Tap options.

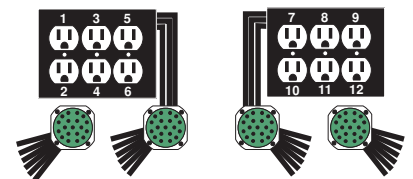

All panels feature hinges and handles for maintenance and repatching of circuits.

(DRSW362) All Connectors wired separately (36ch)

(DRSW362) One Edison set hardwired to Soca (30ch)

(DRSW362) Both Edison set hardwired to Soca (24ch)
